

MASTERING GHANA'S DIGITAL ECONOMY WITH AI

Free. Works on your phone. Right now.

THE BACKBONE OF OUR DIGITAL LIVES

Mobile money isn't just an app in Ghana—it's how we run our lives. But navigating different networks, hidden charges, and merchant setups can be overwhelming.

The Parent: Paying term fees for the kids

The Employee: Receiving monthly salaries

The Business: Setting up Makola merchant tills

The Saver: Managing daily personal savings

What if you had a financial consultant who knew every GHS limit and charge?

THE TELCO & MOBILE MONEY CONTEXT BLOCK

Use this specific prompt block when your question involves mobile money, data, or digital payments. It instantly loads the exact context of Ghana's **digital economy** into the **AI's brain** before you ask your question.

THE PROMPT ANATOMY

You are an expert in Ghana's mobile money and telecoms ecosystem. You know MTN Mobile Money (MoMo), Telecel Cash, AirtelTigo Money, GhIPSS Interoperability, Zeepay, Express Pay, Hubtel...

Define your goal
(e.g., sending,
withdrawing, limits)

My question is about: [your mobile money question].

I am [a personal MoMo user / a business...].

Define who you are
(e.g., Parent,
Business,
Developer)

Please give me accurate, up-to-date practical guidance... including any fees in GHS.

THE PERSONALISATION ENGINE

The Personal Scenario

Kwame loads: [checking Telecel withdrawal limits] + [Personal user]

AI provides standard tier limits, daily caps, and personal e-levy charges in GHS.

The Business Scenario

Ama loads: [setting up a MoMo till] + [Market stall business]

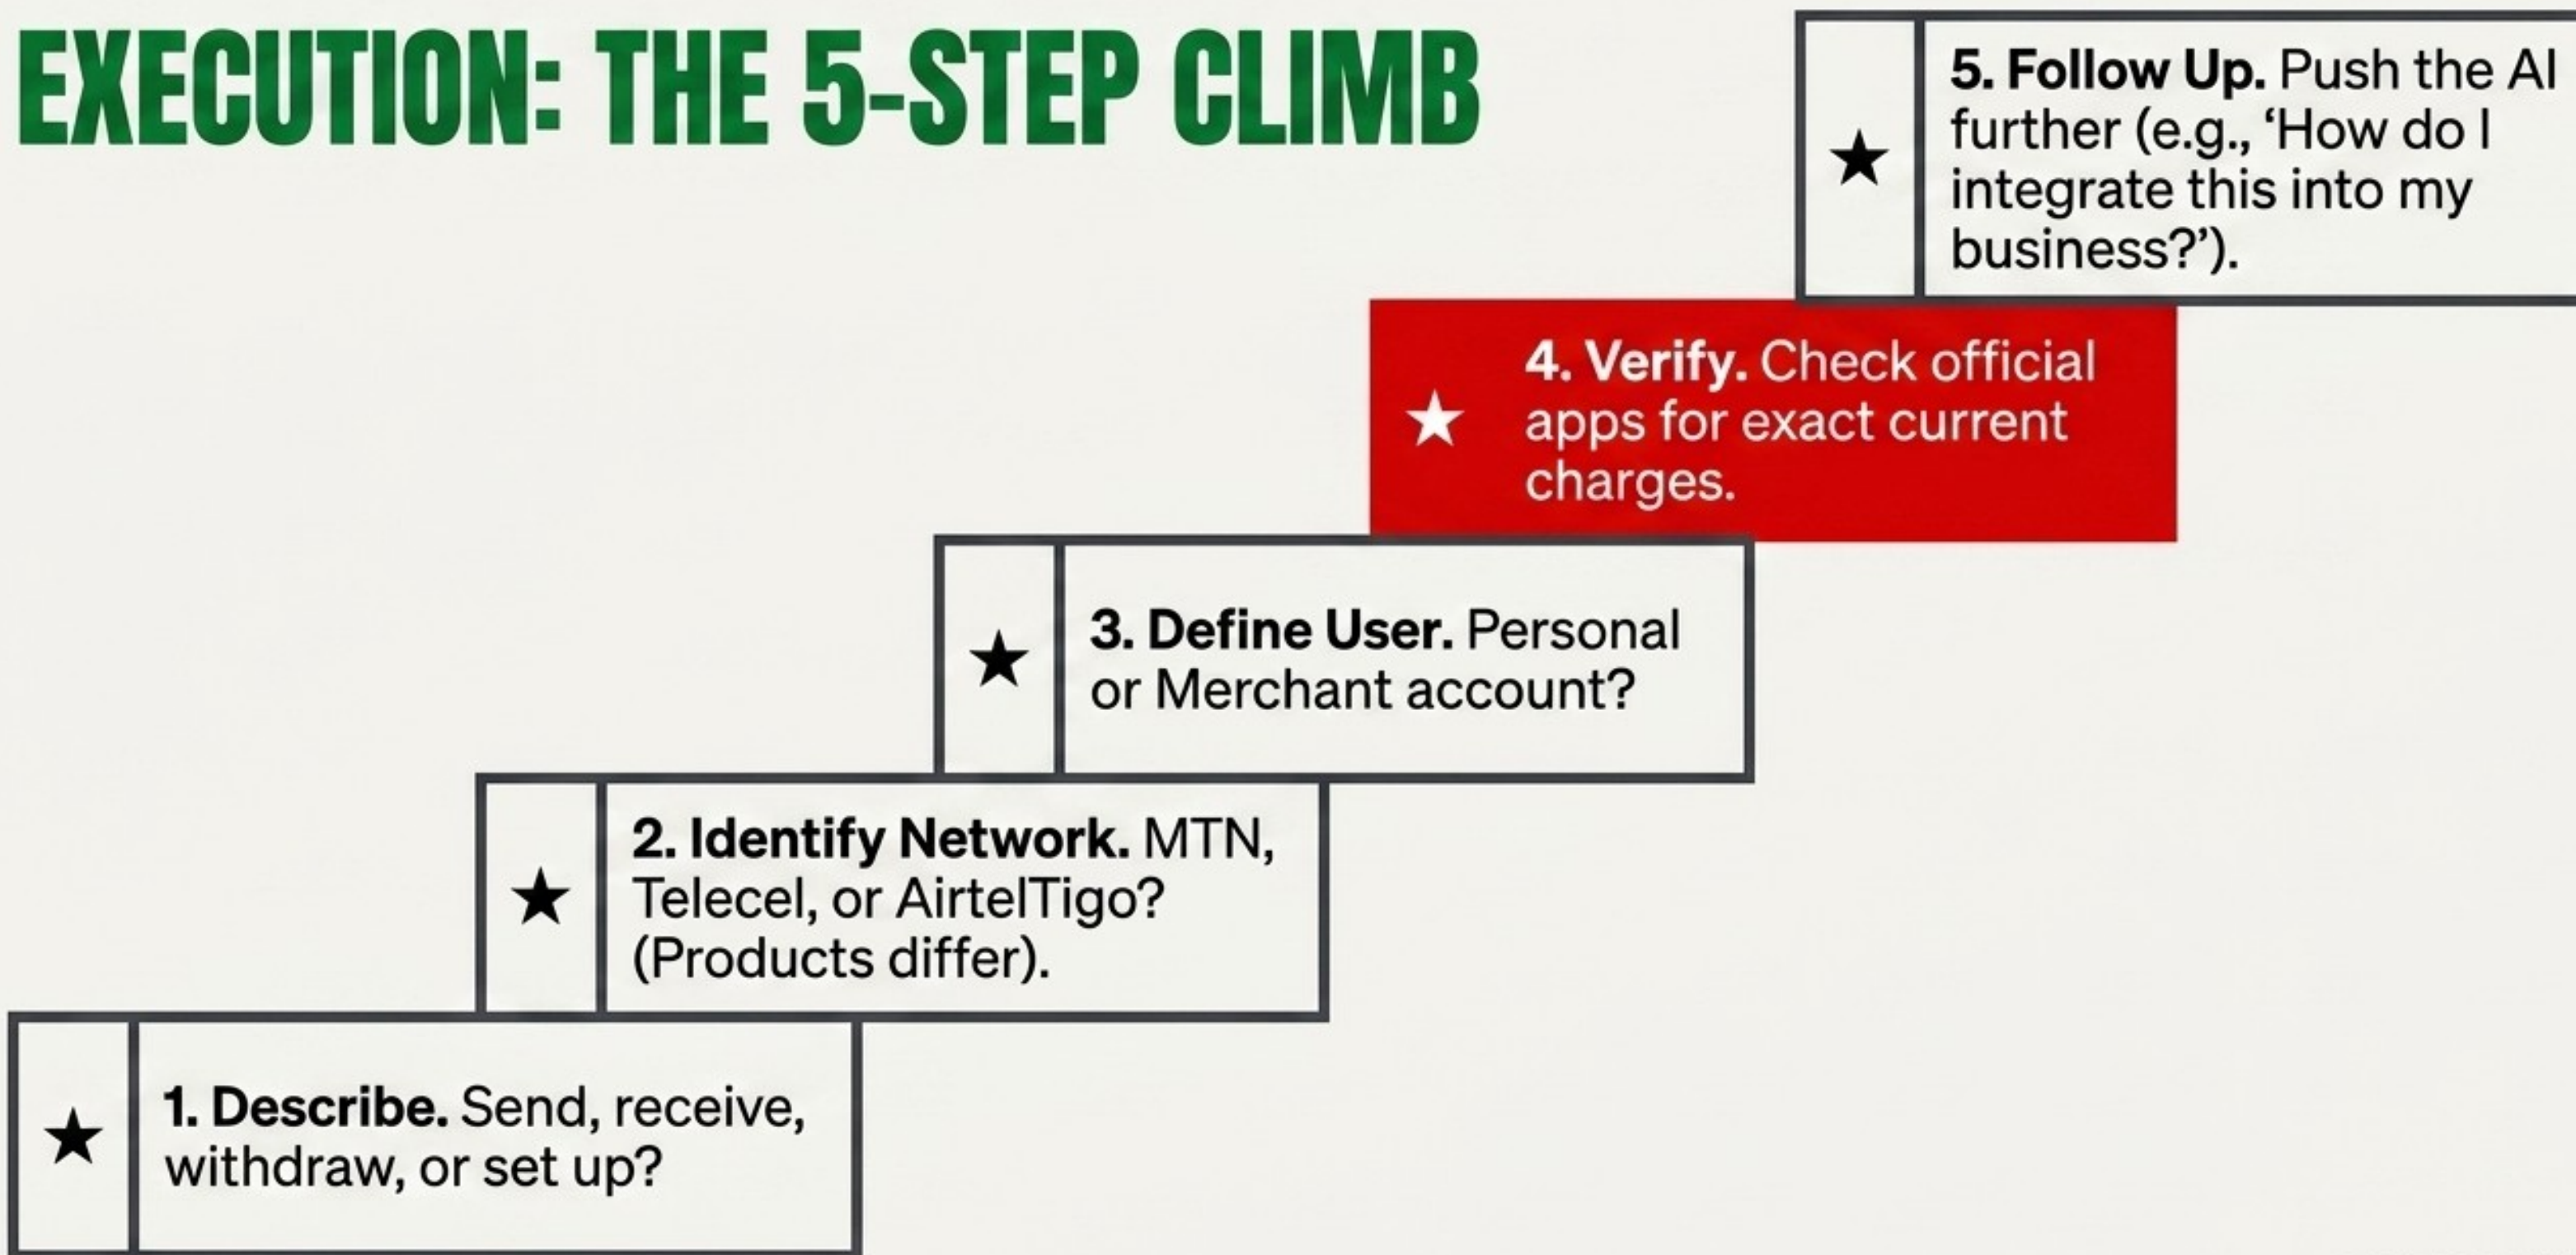

AI skips personal limits and provides merchant API setup, Hubtel integration steps, and business transaction fees.

The AI adapts entirely to your specific Ghanaian context.

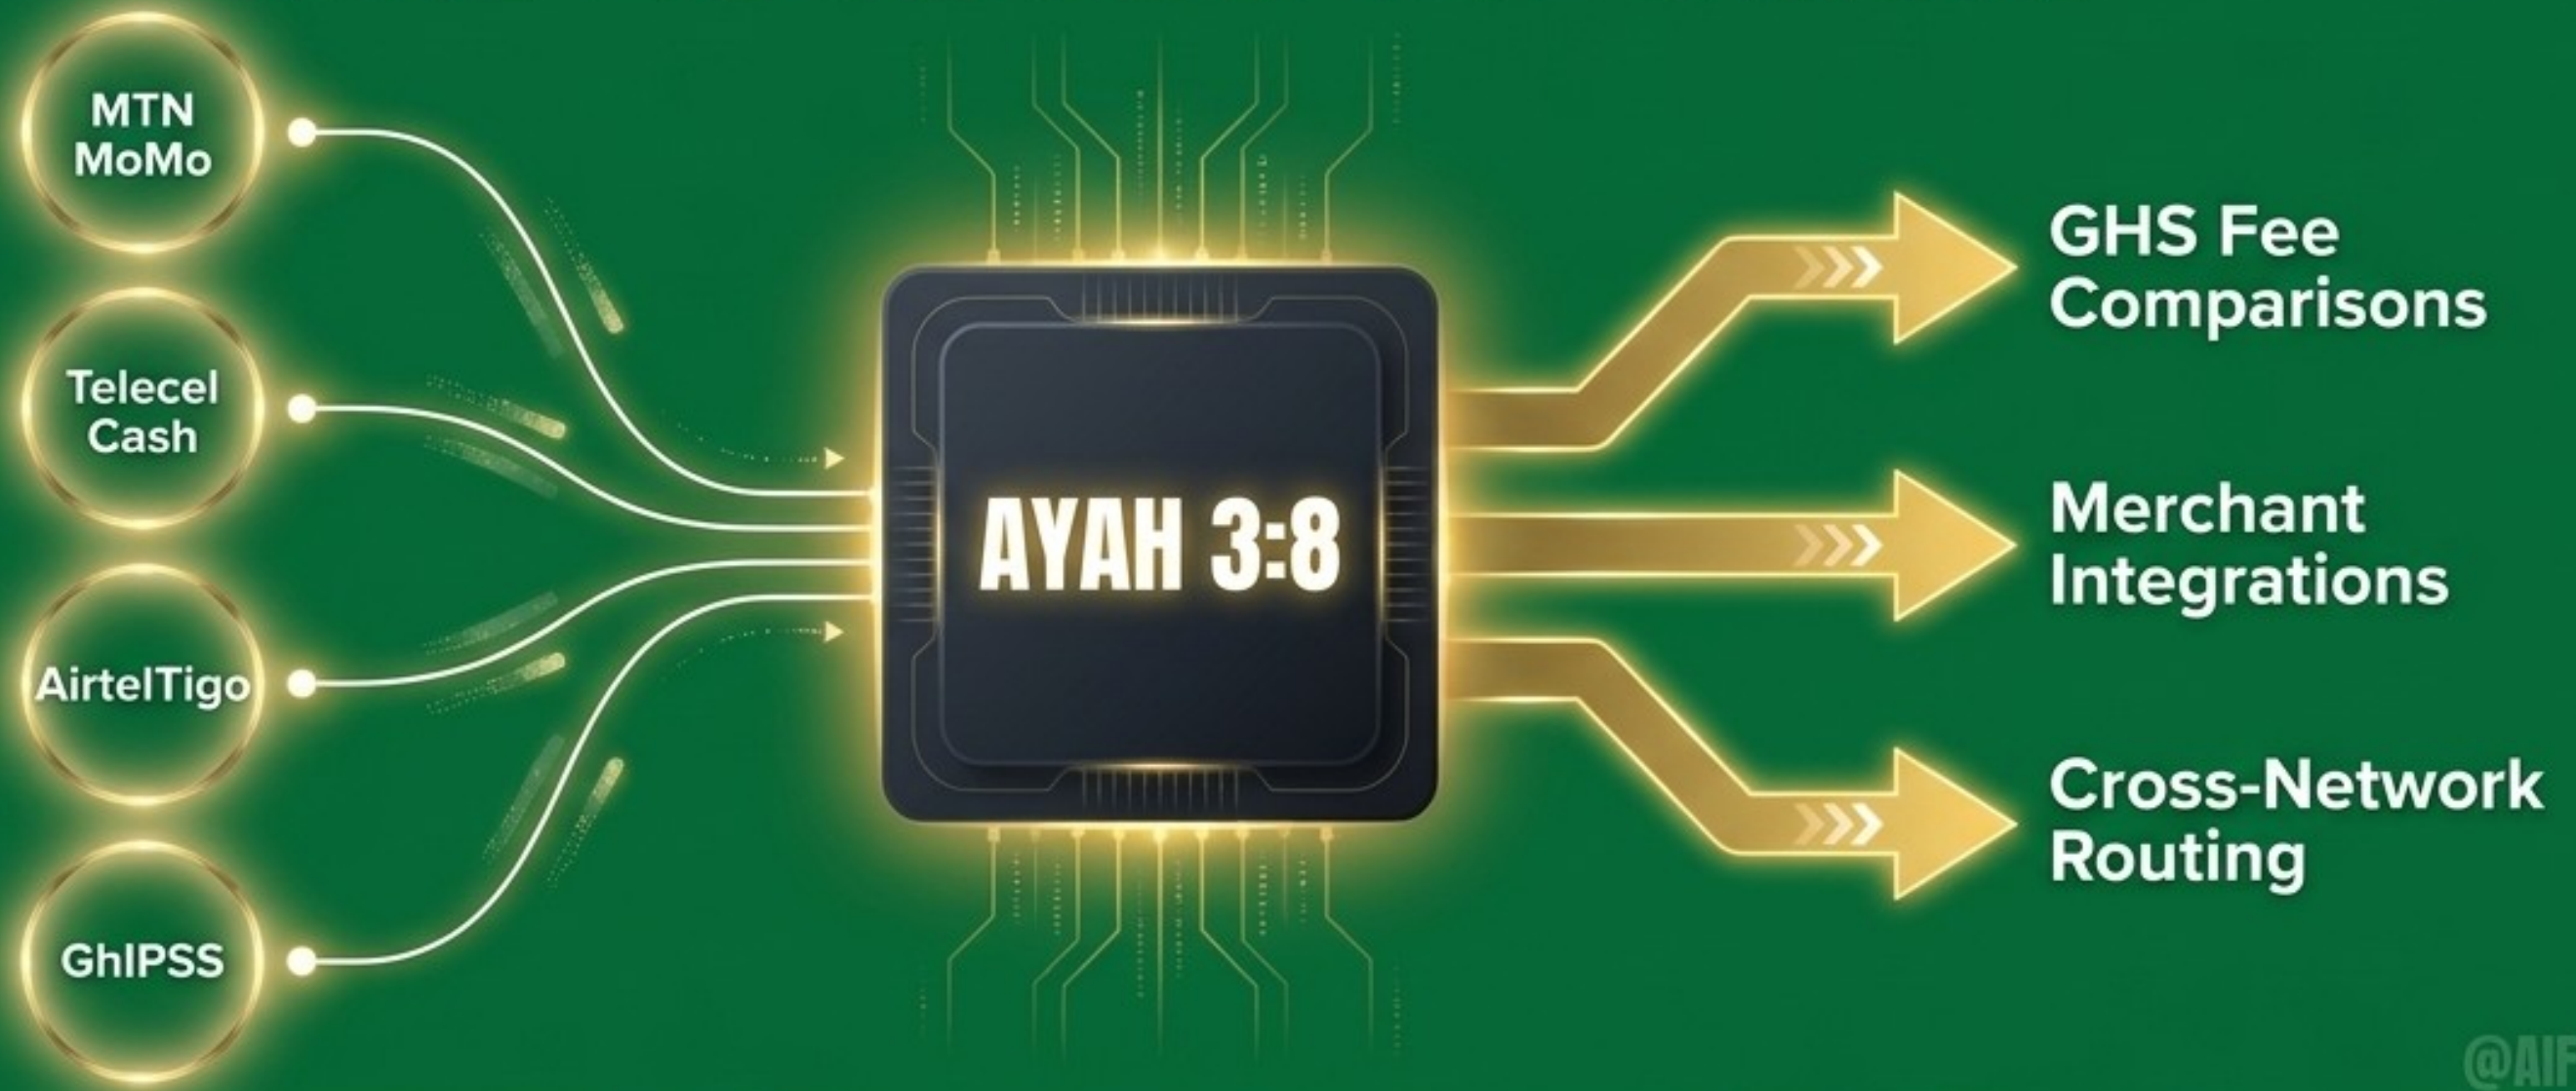

WHO ASKS WHAT? THE UTILITY MATRIX

USER TYPE	PLATFORM FOCUS	BEST QUERY TO ASK
Personal / Parent	MTN & Telecel	Compare transaction charges for sending GHS 500 across networks.
Small Business	MoMo & Hubtel	How do I integrate payment collection for my shop?
Importer / Exporter	Zeepay	How do I receive payments from customers abroad in USD/GBP directly to MoMo?
Developer	Express Pay / GhIPSS	What is the best way to route instant cross-network payments in my app?

EXECUTION: THE 5-STEP CLIMB

THE ECOSYSTEM BRAIN

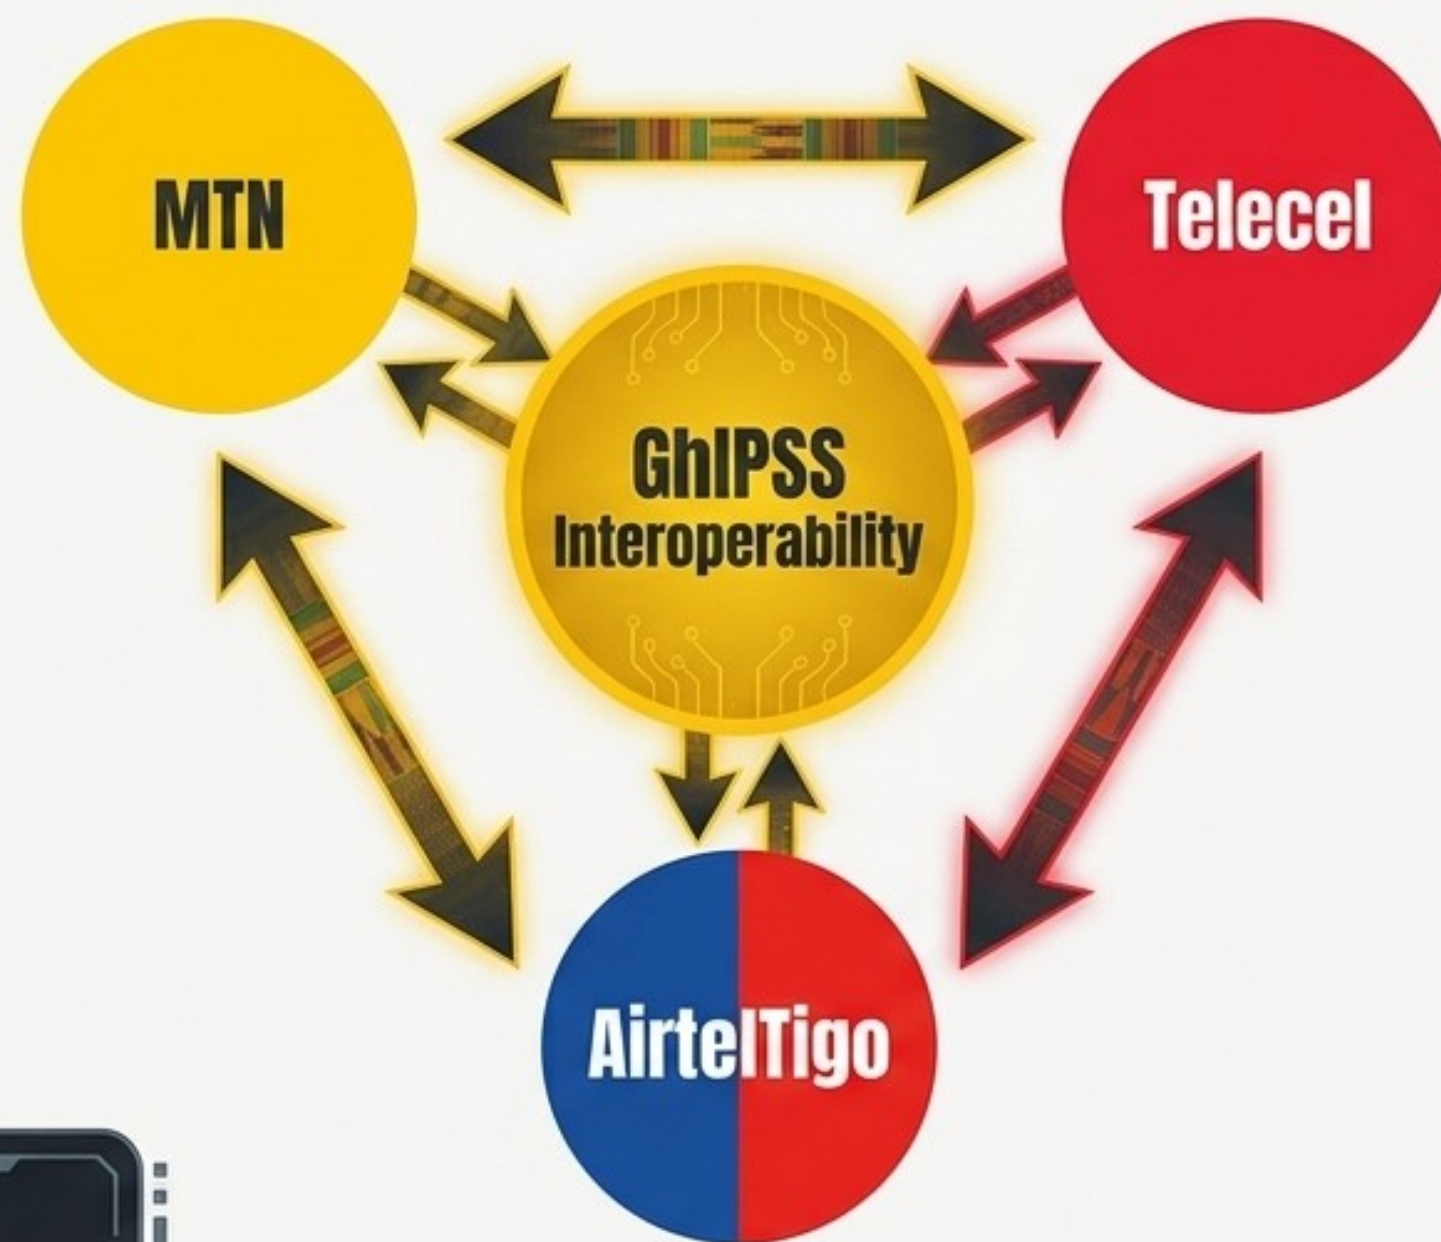

@AIFORGHANA

You aren't just asking a question. You are loading a unified database of Ghana's fragmented financial system into the AI before you speak.

PRO TIP: THE INTEROPERABILITY WEB

You can now send money between different networks instantly. Ask the AI how to navigate GhIPSS for seamless transfers.

Compare the charges for sending GHS 500 from MTN to Telecel vs. Telecel to AirtelTigo.

TRUST, BUT VERIFY

AI is your consultant, but telco fees change.

Always use the AI to understand the structure of the fees (e.g., tier limits, e-levy application), but **verify the exact daily pesewa charges** on your network's official app or USSD menu.

EMPOWERMENT REQUIRES VERIFICATION.
