

STOP ASKING AI FOR HEALTH ADVICE.

(Unless you give it the Ghana Context first).

GENERIC AI IGNORES THE GHANAIAAN REALITY

Generic AI 	Ayah 3:5 AI 
Dietary Advice: Eat kale, salmon, and quinoa. Healthcare Access: Check your insurance copay. Medical Context: Assumes Western clinics and availability of brand-name medications.	★ Dietary Advice: Eat kontomire, garden eggs, and fish. ★ Healthcare Access: Cross-reference with NHIS coverage and district hospital availability. ★ Medical Context: Flags local conditions like Malaria, Typhoid, and Sickel Cell; aligns with GHS guidelines.

I am asking a health question as a person living in Ghana. Here is my context:

MY HEALTH CONTEXT

- Location: [City/town], Ghana
- I access healthcare through: [NHIS / Out of pocket / Both / Private insurance]
- My nearest health facility: [District hospital / Community clinic / Teaching hospital / Private clinic]
- My age: [Age] | Gender: [Male / Female]

GHANAIAN HEALTH SPECIFICS

Please consider these Ghana-specific factors in your response:

- Common conditions in Ghana: malaria, hypertension, diabetes, sickle cell disease, typhoid, cholera, maternal health complications
- The Ghana Health Service (GHS) guidelines apply
- Treatments and medications should be ones available at district hospitals or licensed pharmacies in Ghana
- Food and diet advice should use locally available Ghanaian foods: fufu, banku, kenkey, rice, kontomire, garden eggs, fish, groundnuts, plantain
- NHIS covers many basic services — reference what is and isn't covered when relevant

MY QUESTION

[Ask your health question here]

Please respond in simple English that someone without medical training can understand. If I need to verify any information, tell me to check with Ghana Health Service or a qualified pharmacist in Ghana.

CUSTOMIZE YOUR REALITY

MY HEALTH CONTEXT

- Location: [City/town], Ghana
- I access healthcare through: [NHIS / Out of pocket]
- My nearest health facility: [District hospital]
- My age: [Age] | Gender: [Gender]

THE LOCAL KNOWLEDGE INJECTION

Endemic Conditions

Forces AI to check for Malaria, Hypertension, Diabetes, Sickle Cell, Typhoid, Cholera.

Local Diet Engine

Bypasses Western diets.
Injects Fufu, Banku, Kenkey, Rice, Kontomire, Garden Eggs, Fish, Groundnuts, Plantain.

Infrastructure Rules

Locks advice to Ghana Health Service (GHS) guidelines and licensed pharmacies.

THE CONTEXT FILTER IN ACTION

Ayah 3:5 Context Block

THE PREPARATION LOOP

REAL GHANAIAIAN USE CASES

Doctor Prep

Write down symptoms clearly, list questions to ask, and decode medical jargon before or after a clinic visit.

Local Diet Makeovers

Ask AI how to make your everyday Ghanaian meals (banku, fermented foods) healthier based on your exact diagnosis.

NHIS Navigation

Ask exactly what NHIS covers for a specific condition and what documents you need to bring.

Mental Health

Find coping strategies and guidance on where to seek help, including Accra Psychiatric Hospital and NGO counselling.

AI IS NOT A DOCTOR.

Use this tool to prepare, educate yourself, and write down questions.

Always consult a qualified healthcare professional or licensed pharmacist in Ghana for medical decisions.
