

AI FOR GHANA

AI FOR GHANA: THE DIGITAL ARMOURY MANUAL

Bridging the AI Knowledge Gap in Ghana.
Ask Better Questions. Build a Better Life.

Series: The Ghana Prompt Quran | Creator: by Rauf H. | 2026 Edition

@AIForGhana

ANATOMY OF A GHANA-NATIVE SLIDE

THE BADGE:

Always bold condensed sans-serif. Signals local authority.

RULE #1: Hyper-local context only. If a 16-year-old in Kumasi can't understand it, rewrite it.

THE SIGNATURE:

@AIForGhana at 70% opacity. Protection for the creator.

THE ANCHOR:

Green/Gold/Red strip. Grounding the design in national identity.

@AIForGhana

THE VISUAL VOCABULARY MATRIX

THE RIGHT WAY - Authentic Context

Locations: Kejetia market, Korle Bu hospital, trotro stops.

People: Students in SHS uniforms, farmers in smocks, chop bar operators.

Economy: GHS (Cedis), MTN MoMo, WAEC, NHIS.

THE WRONG WAY - Generic Outputs

Locations: Generic Western supermarkets, pristine glass skyscrapers.

Imagery: Glowing blue AI robots, binary code overlays.

Economy: USD (\$) pricing, generic credit cards.

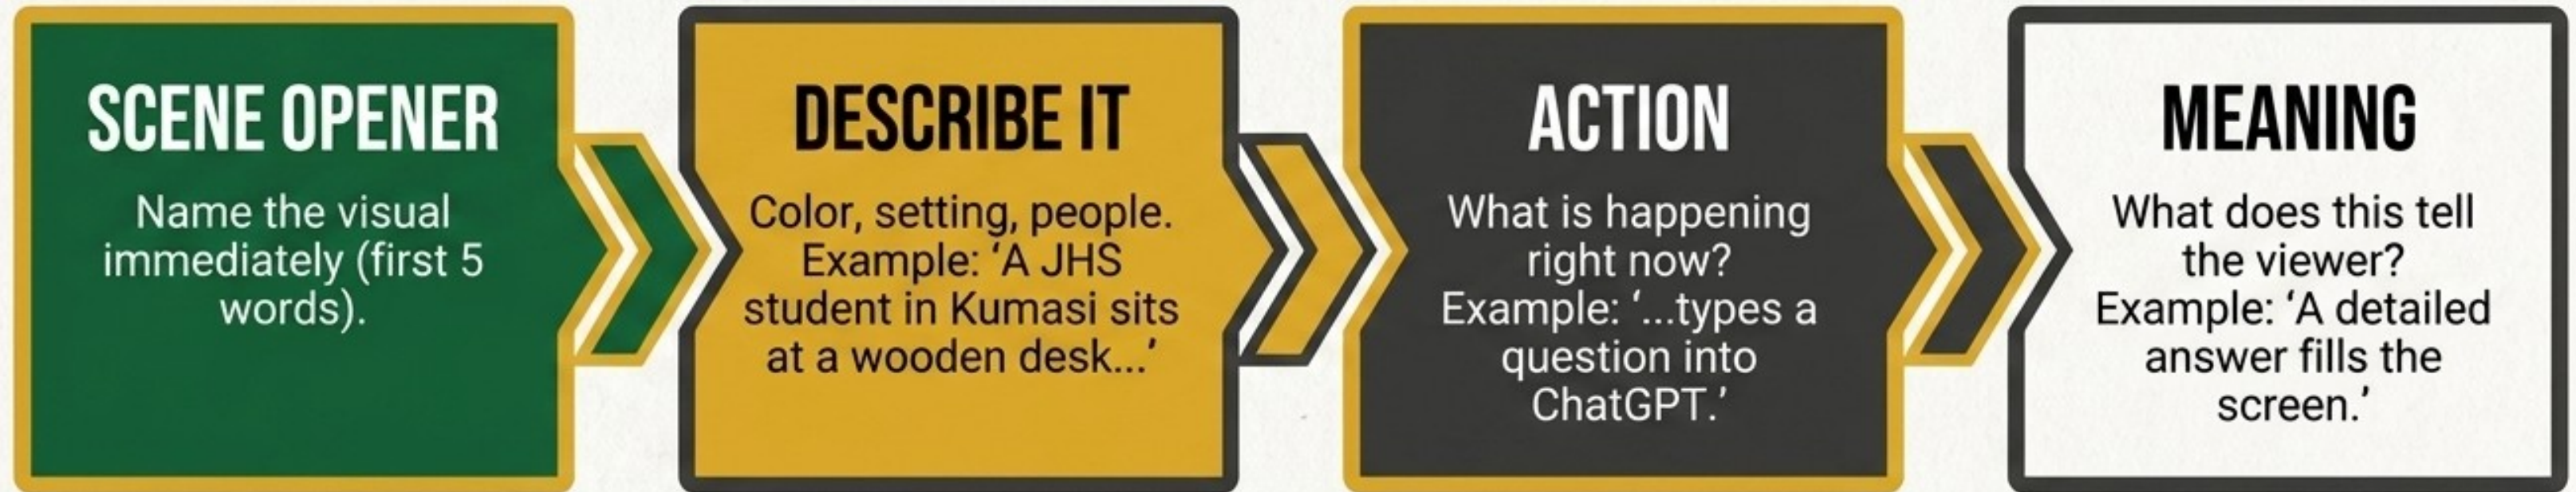

AI must reflect the reality of Tamale, Accra, and Cape Coast.
Generic prompts yield useless outputs.

THE GOLDEN RULE OF VISUAL SYNC

NotebookLM reads your words and generates a picture for each paragraph. If your text is vague, the visuals will be random. Paint a single picture with words.

THE 4-PART SCRIPTING FORMULA

Host dialogue comes AFTER the scene is set – never before.

AI FOR GHANA

THE PROMPT ARCHITECTURE

A vague prompt is like standing silent at a chop bar. Tell it exactly what to serve.

GHS 500 MILLION LOST.

A Ghanaian businessman received a WhatsApp message from his “bank” asking him to verify his MoMo PIN.
He did.

WITHIN 4 MINUTES, GHS 12,000 WAS GONE.

Cybercrime cost Ghana over GHS 500 million last year.
Digital safety is not optional in 2026. This verse is your digital armour.

AYAHA 16:2 — THE CYBERSECURITY PROTECTOR

You are a Ghanaian cybersecurity expert...
I want to [protect my personal accounts / business / family].

My situation: [describe devices/suspicious activity].
Please give me:

- 1) Top 5 cyber threats targeting Ghanaians right now.
- 2) A 30-minute step-by-step personal security audit.
- 3) Exact security settings for WhatsApp, Facebook, Gmail, and MoMo.
- 4) How to report cybercrime in Ghana.
- 5) A family safety training outline.

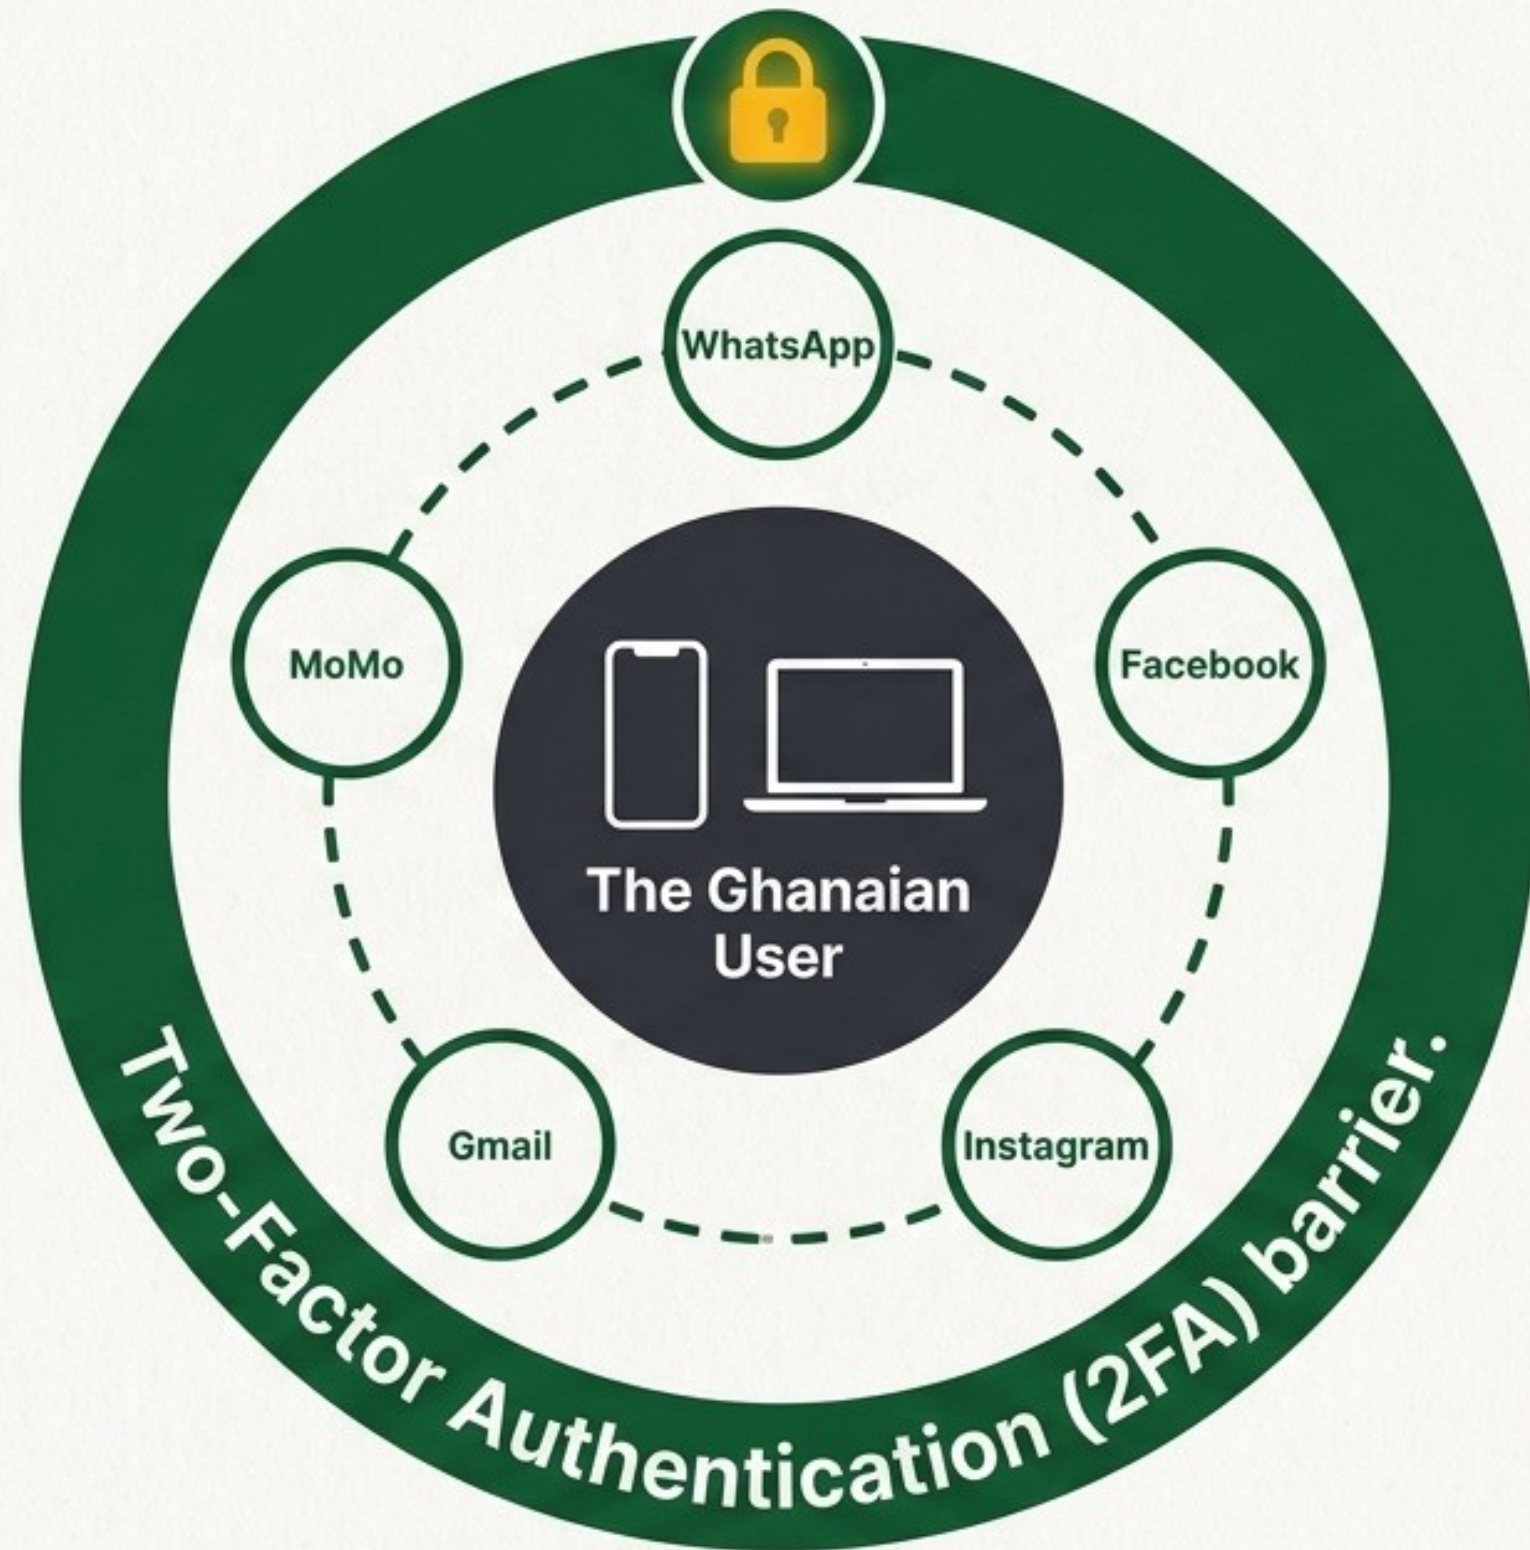

Replace brackets with your specific situation. Run this prompt today.

THE THREAT & SHIELD DIAGNOSTIC

THREAT	SHIELD
Mobile Money (MoMo) Fraud.	NEVER share your MoMo PIN. Not with your bank, not with MTN. Real institutions never ask.
SIM Swap Fraud (Rampant in Ghana).	Ask AI: "How do I protect my SIM card from illegal transfer?"
SME Business Hacking.	Ask AI to create a cybersecurity policy specifically for a Ghanaian SME with <20 staff."

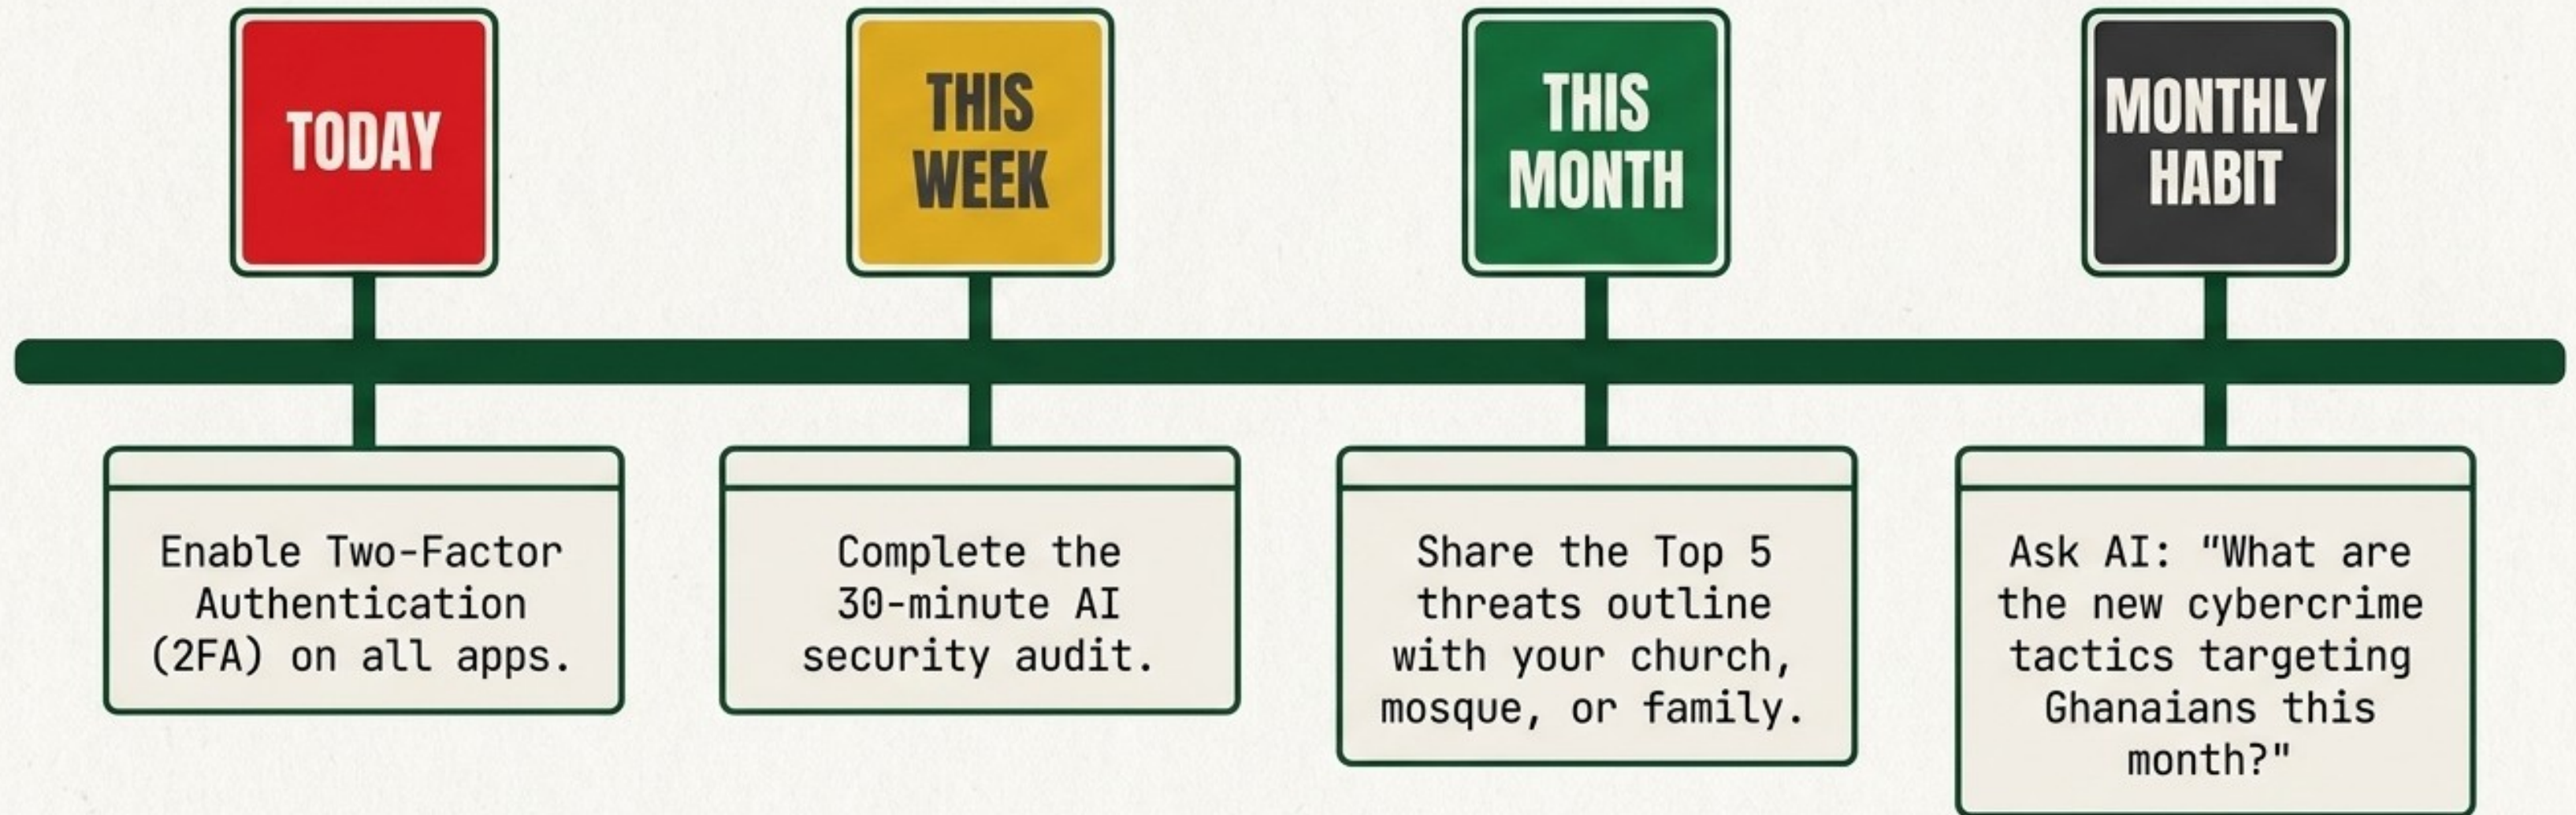

Elder relatives are the most vulnerable. Share these threats in your family WhatsApp group today.

THE 30-MINUTE AUDIT SHIELD

Enabling 2FA on every account stops 99% of hacking attempts.

THE DIGITAL SURVIVAL TIMELINE

If compromised:
Contact Ghana Cybercrime Unit — 030 2773 906

THE FORMULA FOR DIGITAL EMPOWERMENT

Aesthetic rules and scripting formulas are not just for looking good. They are the exact delivery mechanisms required to save Ghanaians from cybercrime.
